3D Model & Game

Scarab

- I created this Scarab for the *Design for Interactive Media* course for my Master of Science in Digital Media Design. It was part of an experimental game developed on Unity. The Scarab and the 3D animation were designed and rendered through Blender
- Software: **Blender, Unity**

zine interactive book

Taste of Home مذاق الوطن

- I created this bilingual mixed media cookbook from concept to design&publishing (print and online) as the Multimedia Focal Point for **IOM MENA** featuring recipes contributed by migrants across the MENA region, from their homeland and showcases how these culinary traditions have sometimes evolved in their new environments. By scanning the QR codes, you can watch them prepare these dishes in their new host countries, in bilingual videos I compiled and edited.
- Audience: "Taste of Home" was featured in print in the UN booth at the Cairo International Book Fair (2025). It was also featured in book fairs in Syria and Saudi Arabia in 2025. It is also available online on the IOM website.
- Software: **Adobe Illustrator**

Book Online: <https://bit.ly/44A91Xv>

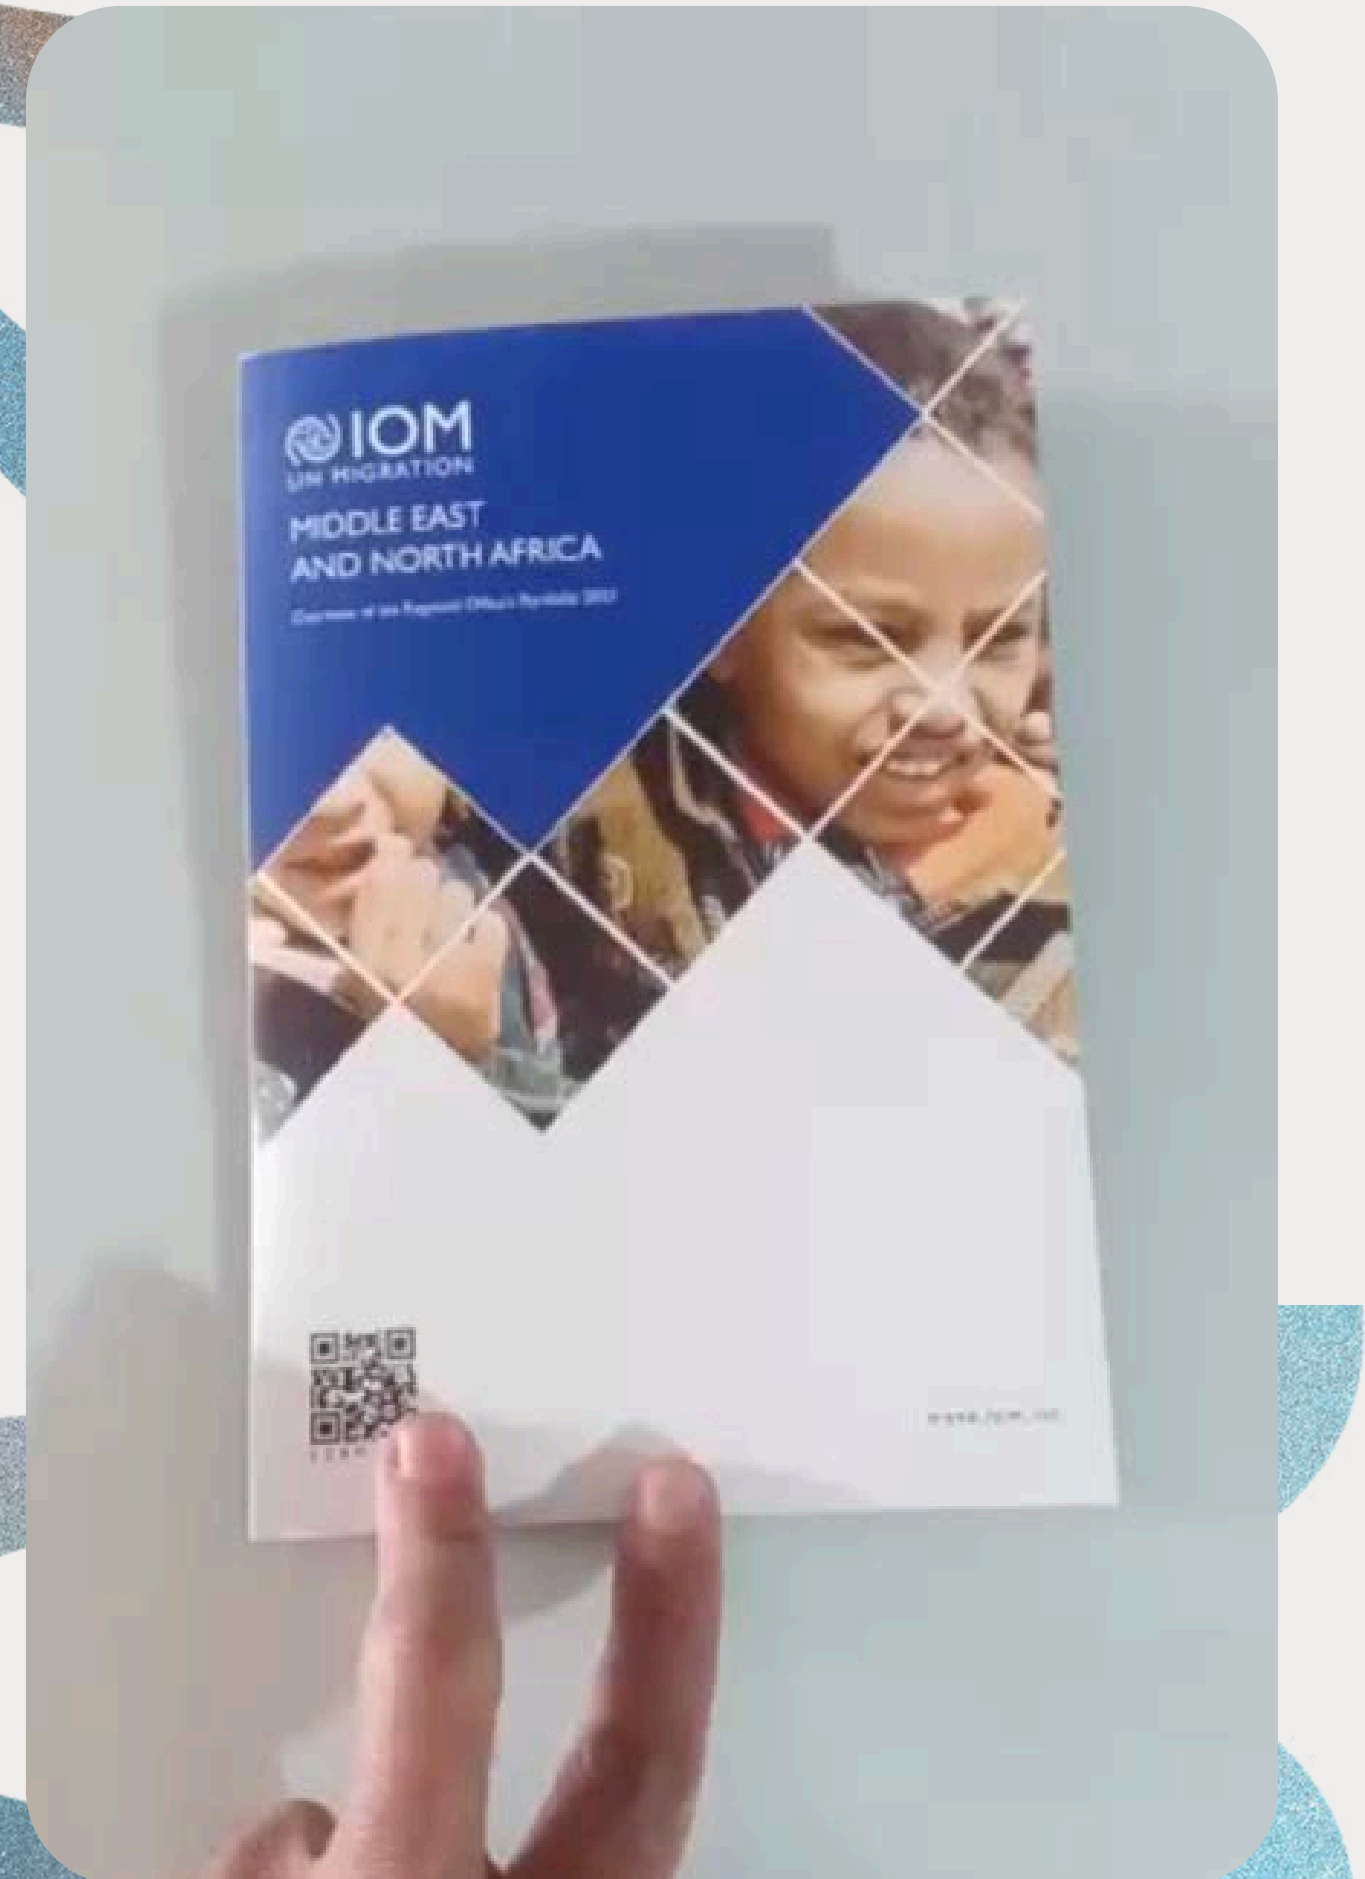

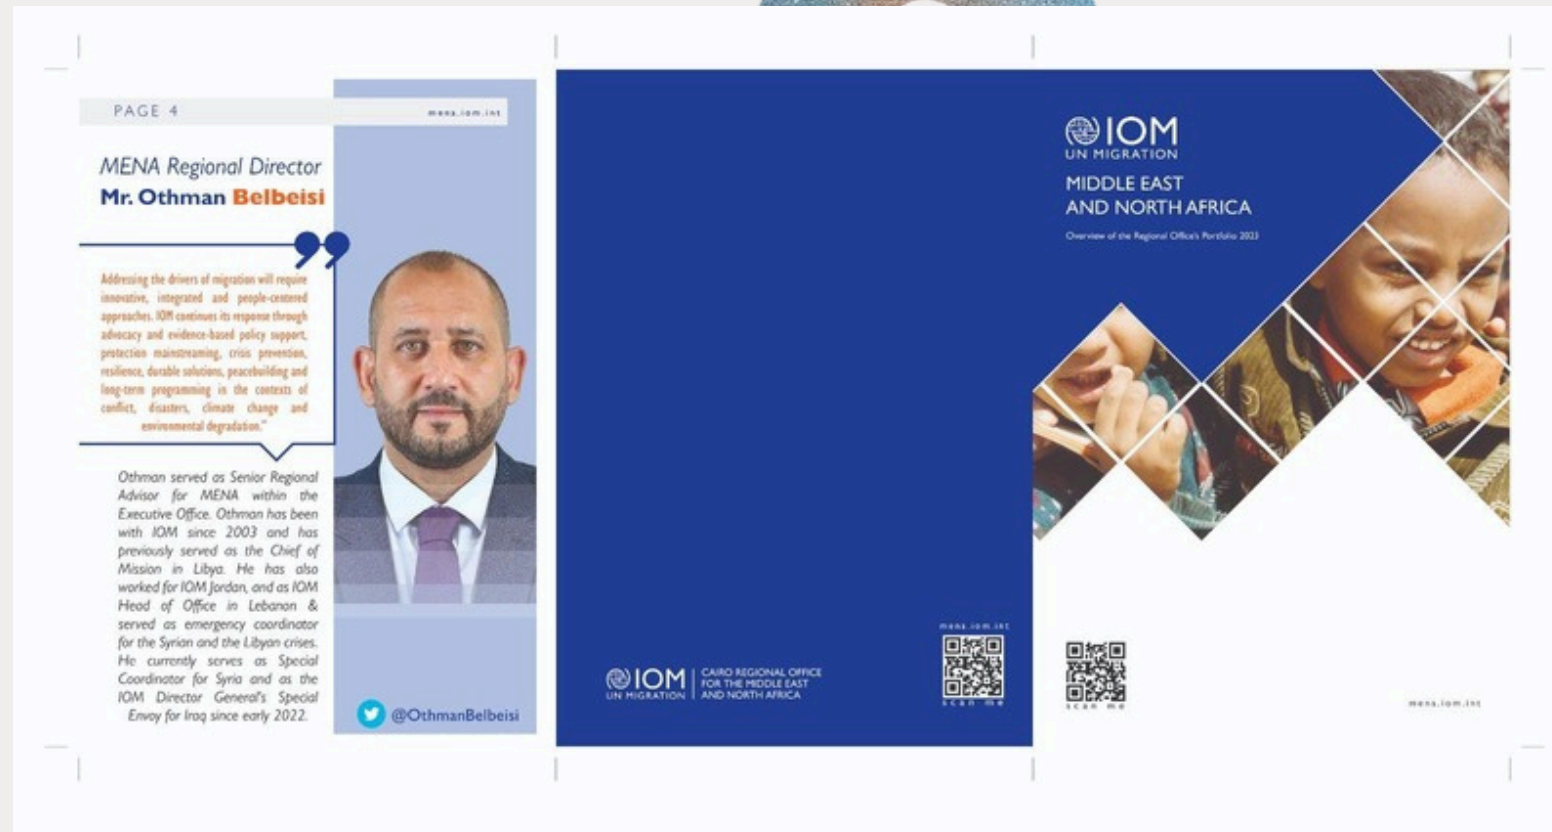

trifold brochure

Middle East and North Africa: Overview of the Regional Office's Portfolio 2023

- Infographic print brochure created in 2023 to visually represent **IOM MENA** portfolio and scope. I created the design including the product print design, as the multimedia focal point with IOM RO MENA.
- Audience: potential donors
- Software: **Adobe Illustrator and InDesign**

medals& certificates

ROlympics

- **IOM MENA REGIONAL OFFICE:** As a member in the *Social Initiatives* staff IOM MENA club, I created the award design and idea for the “*ROlympics*” which is a voting-based acknowledgment of achievement between staff to elevate morale
- Audience: IOM MENA Internal Staff Comunion
- Software: **Adobe Illustrator, Canva**

social media

IOM Motion Graphics Video [Adobe AfterEffects]

I wrote the script, recorded VO, created 3 versions for different languages, I sketched the drawings on Photoshop and animated them on Aftereffects

Youtube 3D Immersive VR [Software: Blender]

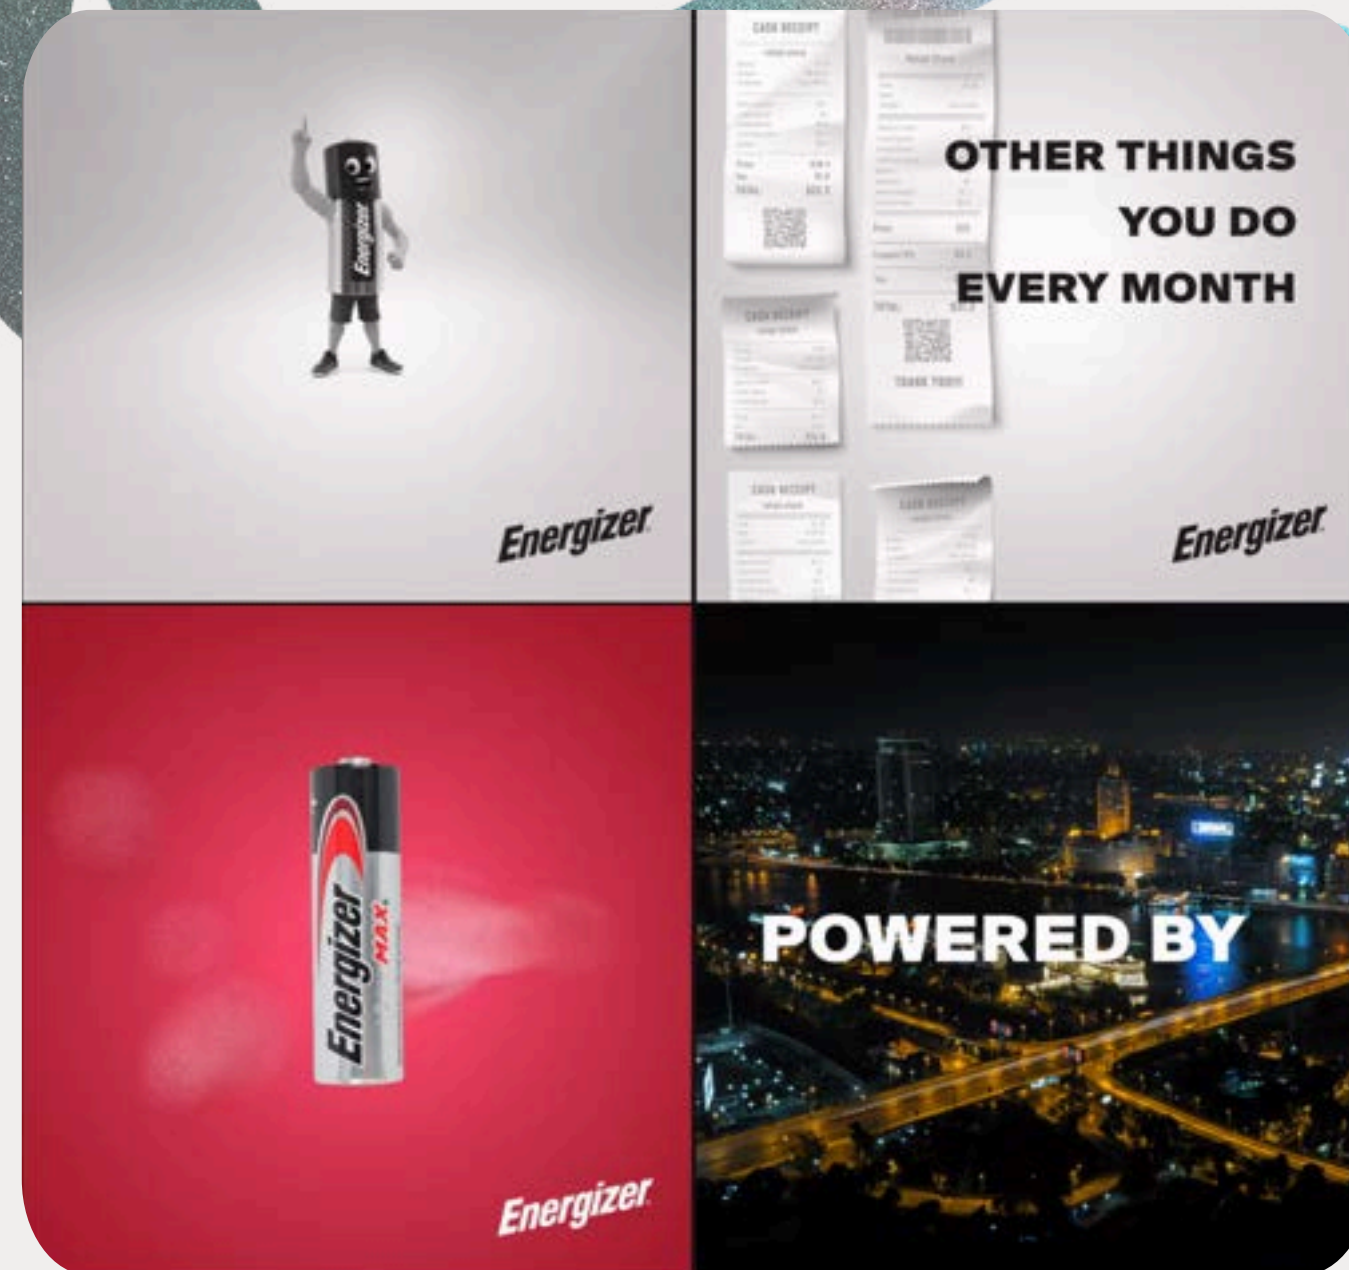

I had this idea and created the full project as part of the Missing Migrants report launch campaign. I 3D designed the world on Blender and the text design was on Illustrator and the immersive experience on Premiere to be compatible with youtube
